

## AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

[0029] Inside of the heating roller 262, i.e., in the closed space 262c of the heating roller 262, is disposed an induction heating coil 264 which is applied as a heating member. The heating member is an induction heating body generating a magnetic field to the heating roller 262. The induction heating coil 264 is coiled around a magnetic core ~~(not shown)~~264a.
